WASTE NOT

from Hamilton County Recycling and Solid Waste District

District Launches New Campaign to Help Organizations Reduce Waste

Whether you are an office, bar, restaurant, school, church, apartment complex or retirement home, the District can help you reduce and better manage your waste. Our new program, Let's Stop Waste, not only helps businesses and organizations set up recycling, but also incorporates reuse and waste reduction into your space.

District staff members visit your site and offer customized advice specific to your needs. The District also provides interior recycling containers, signage, educational and promotional materials to help get recycling started.
